Repairs Planned for Highway 8 in SE Neb

LINCOLN, Neb. (AP) - Work is scheduled to begin Aug. 31 on state Highway 8 in southeast Nebraska's Gage County.

The Nebraska Roads Department says the project will run east from Nebraska Highway 112 to the junction with U.S. Highway 77.

The department expects that traffic will be hampered, given the deployment of flaggers and pilot cars during construction.

The work is expected to be finished by late fall.
