Illegal Power Hook Up Sparks Investigation

(KAIR)--Atchison County authorities are trying to find who ever is responsible for powering a location in Muscotah illegally.

According to Sheriff Jack Laurie, his office was notified by the City of Muscotah that someone used heavy gage wire to make a connection in order to bring power to 108 West 2nd Street.

The wire was used where a power meter would normally be in place.

Laurie says the investigation is ongoing; and while a possible suspect is pursued, anyone with information about the crime should contact his office.
