Railroad Improvements Wrap Up In Atchison (KAIR)--A smoother ride for Atchison motorists.

That comes following a makeover this week for a heavily traveled route in the city.

According to Union Pacific Railroad spokesperson Calli Hite, Atchison's 10th Street railroad crossing has undergone an extensive makeover, with railroad crews putting the wraps on the project.

Hite says the work included the laying of new rail through the area, creating a smoother, more efficient, ride for trains. Crews also replaced the grade crossing with new crossing panels and asphalt, intended to provide a smoother driving surface for motorists traveling across the tracks once fully re-opened.
