Boil Advisory Rescinded for Robinson

(KNZA)--The boil water advisory has been rescinded for the Brown County community of Robinson.

The advisory was issued September 22nd by the Kansas Department of Health and Environment because of a line break resulting in a loss pressure in the system.

Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE said in a news release Saturday that laboratory testing samples collected from the City of Robinson indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
