

Fire damages Atchison home

**(KAIR)--No injuries were reported – but some structural damage resulted from a chimney fire that broke out early Monday morning at an Atchison home.**

**According to Atchison Fire Chief Ted Graf, crews were dispatched to the residence at 601 Atchison Street shortly after midnight.**

**Graf says fire crews could see flames when they pulled out onto the apron since the residence is only one block north of the fire station.**

**He said the fire was not in the flue, but in a wooden enclosure around the chimney that had recently been built.**

**Graf says that the house received some smoke and water damage, but is likely still habitable. A damage estimate wasn't immediately available.**

**Graf says the homeowners were home when the fire broke out, but got out safely.**
