Visitor Restrictions Lifted at Falls City Hospital

(KLZA)-- Visitor restrictions at Community Medical Center in Falls City that have been in place since February 7th have been lifted.

The visitor restrictions were implemented due to the high rate of influenza in the community. Only 1-2 primary family caregivers had been allowed to visit patients and no one under the age of 18 was allowed to visit unless special exceptions were made.

Community Medical Center CEO Ryan Larsen thanked everyone for their cooperation.
