I-29 Resurfacing Project To Begin In Holt County

(KLZA)-- The Chester Bross Construction Company will begin a resurfacing project on Interstate 29 between Route W and Route 118 in Holt County, Missouri on Monday.

The contractor will mill and resurface the northbound driving lane first. The work will begin at Mound City and proceed to Route W near Corning. Northbound I-29 will be reduced to one lane during the work.

Once the northbound lane is complete, they will move to the southbound driving lane. They will then repeat the pattern with the passing lanes and shoulders. All the work should be completed by mid-July, weather permitting.
