Body found in St. Joseph identified

(MSC News)-- St. Joseph Police have identified the body of a man found earlier this week in a shed on the city's south side.

Police Wednesday identified the victim as 50-year-old Lonza Eugene Cunningham.

Cunningham's body was found Sunday evening in a shed with a gas generator running after police responded to the 100-block of Gideon Lane.

Police suspect the death was due to carbon monoxide poisoning

Police say they will wait for a toxicology report before releasing any more information.
