

Repairs needed at Hiawatha sewer plant

**(KNZA)--The Hiawatha City Commission has approved an agreement with a Kansas City, Missouri engineering firm to determine needed repairs at the city's sewer treatment plant.**

**The Commission Monday evening approved an agreement with Olsson Associates to troubleshoot the current operational issues with the existing control system at the plant and develop an estimated repair cost.**

**The firm will provide the service for a fee of \$4,900.**

**The repairs will provide a short term fix as new controls will have to be installed in a couple years to meet Kansas Department of Health and Environment regulations.**

**In other action, the Commission accepted the lone bid submitted by Jadwin Construction, of Hiawatha, for a sewer line replacement project from 2nd to 3rd Street between Cheyenne and Pawnee Streets.**

**The bid was for \$28,160.**
