Missouri Ready to Resume Executions

The state of Missouri is ready to resume executing prisoners on death row. The Department of Corrections has found a different drug to replace sodium dipentathol after it was pulled from the market.

Jessica Machetta with the Missouri News Network has more on this story. (play audio :59 seconds)

Attorney General Koster has submitted a list of death row inmates to the Supreme Court, asking the court to expedite the process in moving forward with in carrying out their sentences.
