Falls City FFA Receives Donations for Plasma Cutter

The Falls City High School Future Farmers of America chapter recently received several donations from supporters toward the purchase of a computerized plasma cutter, a precision cutting process used to create shapes and parts that are smoother, more intricate and more accurate at a much higher speed.

Donations came from AIRLANCO, EDGE, 4 Corners Ag, WASP and the FFA Alumni.

The plasma cutter will be used in the welding and fabrication classes to teach students new technologies available to them. By allowing students to access this type of equipment, it will help prepare them for future careers within the manufacturing industry.
