

**NW Missouri Bridge Inspections Planned**

**(KLZA)-- A Missouri Department of Transportation new release says Missouri has more than 10,000 bridges across the state and each is part of a program of inspection, repair and maintenance to keep them in the best condition possible for those who travel Missouri's highways. In-depth under-bridge inspections are part of that program and the schedule of these inspections for several bridges in Northwest Missouri over the next few weeks has changed.**

**Crews from the Missouri Department of Transportation may close a single lane on the bridges as they conduct routine under-bridge inspections. All work is weather permitting and could be rescheduled. Some of these work zones may be moving operations and motorists are advised to be alert for work zone signs and extra equipment on the roadways around these bridges and ramps.**

**Week of August 15:**

**Atchison County**

**Route J bridge over the Tarkio River**

**Holt County**

**Bridges over I-29 on U.S. Route 59, Elmwood Road, Beagle Road, Route Y, Greystone Road, and Ironwood Road (mile marker 96 – 69)**
