Lancaster boil advisory lifted

(KAIR)--The boil water advisory for the City of Lancaster has been lifted.

According to a news release issued by the Kansas Department of Health and Environment, the all clear was given for the Atchison County community Tuesday.

Laboratory testing samples collected from the City of Lancaster indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.

The advisory was issued August 14 because of a loss of pressure.

Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.
