Boil advisory issued for Jeff Co water district

(KNZA)--A boil water advisory has been issued for Jefferson County Rural Water District #10.

The Kansas Department of Health and Environment issued the advisory Sunday due to a line break resulting in a loss of pressure in the system.

KDHE says failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

Customers are advised to boil the water they use for drinking or food preparation for one minute prior to use or use bottled water.

The advisory will remain in place until further notice.
