Historic lows reported in Nebraska unemployment

(KLZA)--The Nebraska unemployment rate continues to set new all-time lows.

For the month of November the statewide unemployment rate dipped to a lowest-ever recorded 1.8 percent.

Locally in Southeast Nebraska the unemployment rate ranged from a low of 1 percent in Pawnee County to a high of 1.2 percent in Johnson County.

The unemployment rate was 1.1 percent in Richardson, Otoe, Nemaha and Gage counties.

Some of those that are unemployed aren't eager to return to work since there are caring for relatives or have concerns about the pandemic.
