

Boil water advisory for Jeff Co RWD#10 lifted

TOPEKA – The Kansas Department of Health and Environment (KDHE) has rescinded a boil water advisory for the Jefferson County Rural Water District No. 10 public water supply system located in Jefferson County. The advisory was issued by KDHE because of a loss of pressure in the distribution system caused by a power outage. Failure to maintain water pressure may lead to a loss of chlorine residuals and bacterial contamination.

Public water suppliers in Kansas take all measures necessary to notify customers quickly after a system failure or shutdown. Regardless of whether it's the supplier or KDHE that announces a boil water advisory, KDHE will issue the rescind order following testing at a certified laboratory.

Laboratory testing samples collected from Jefferson County Rural Water District No. 10 indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.
