Boil water advisory rescinded for Jeff Co RWD#10

(KNZA)-The Kansas Department of Health and Environment has rescinded a boil water advisory for the Jefferson County Rural Water District 10 public water supply system.

The advisory was issued Tuesday because of a line break resulting in a loss of pressure in the system. KDHE says failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE, in a release Friday, said laboratory testing samples collected from water district indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
