U.S. 73 bridge survey planned in Brown County

(KNZA)--A Kansas Department of Transportation field survey will begin tomorrow, June 13, on the U.S. 73 bridge over Otter Creek located about 3 miles east of Horton.

KDOT says the survey is necessary to gather information for the detailed design of proposed improvements and is expected to be completed by July 3.

Joe Bowen, P.S., Survey Project Manager, KDOT, will be in charge of the survey.

A member of the survey crew first will contact property owners and/or tenants for permission to enter private property.

Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.
