Boil water advisory rescinded for Reserve

(KNZA)--The Kansas Department of Health and Environment has rescinded a boil water advisory for the City of Reserve public water supply system located in Brown County.

The advisory was issued July 11 because of an equipment malfunction which caused a loss of pressure. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE said Wednesday that laboratory testing samples collected from the City of Reserve indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
