Boil water advisory lifted for Oketo

(KMZA)--The Kansas Department of Health and Environment has rescinded a boil water advisory for the City of Oketo water supply system located in Marshall County.

The advisory was issued August 9 because of a line break resulting in a loss of pressure in the system. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE said Wednesday that laboratory testing samples collected from the City of Oketo indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
