

U.S. 36 bridge replacement set in Nemaha Co

**(KMZA)--A Kansas Department of Transportation bridge replacement project is scheduled to begin Thursday, February 1st, on U.S. 36 Highway in Nemaha County, conditions permitting.**

**The structure is about 2 miles west of Baileyville.**

**KDOT says Initial work will consist of constructing a shoofly detour to carry traffic around the existing bridge. Traffic impact should be minimal during this phase of the project.**

**The shoofly is expected to be complete later this spring. Traffic will then be shifted to the detour while the bridge is replaced.**

**Work will occur Monday through Friday during daylight hours and is expected to be complete by December.**

**Reece Construction, of Salina, is the prime contractor on the \$4.2 million project.**
