\$177 K earmarked for Marysville Police; Moran credited
(KMZA)--It's good news for the Marysville Police Department, with the agency giving credit to United States Senator Jerry Moran for securing more than \$100,000 for department upgrades.

According to a social media post Wednesday, the police department announced that it wished "to take a minute and publicly thank [Moran] and his staff member Marissa Lux," adding that Moran worked tirelessly to secure \$177,000 in congressionally directed spending" for the Marysville Police.

The post explains that the "funding will include the acquisition of a TruNarc drug detecting analyzer that will improve officer safety when investigating dangerous drug crimes including Fentanyl."

Funds will also be used to update the department's in-car camera systems and fund their UTV.

The post closes by giving additional thanks to Moran, adding that the department appreciates him "for working hard to keep Kansans safe."
