

K-9 bridge replacement underway in Nemaha County

**(KMZA)--A Kansas Department of Transportation bridge replacement project is underway on K-9 in Nemaha County. The Spring Creek drainage structure is about 2 miles west of Wetmore, at the intersection of V Road.**

**During construction, KDOT says K-9 will be closed in the project area. Motorists can follow the signed detour on K-62, K-16, and U.S. 75, or use alternate routes that are not marked. KDOT utilizes state highways for official detour routes for safety, weight and maintenance reasons.**

**Work will take place Monday through Friday during daylight hours and is expected to be complete by mid-August, conditions permitting.**

**Ebert Construction Company, of Wamego, is the contractor on the \$1.2 million project.**
