Boil water advisory lifted for Jefferson Co district  
**(KAIR)--The Kansas Department of Health and Environment, Thursday, rescinded boil water advisories for the Jefferson County Rural Water District #10 public water supply systems located in Jefferson County.**

**According to a release from the KDHE, laboratory testing samples collected from the water district indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.**

**The advisory took effect Monday when KDHE officials issued it due to a broken water line resulting in low pressure in the distribution system. Failure to maintain adequate pressure may put the system at risk for bacterial contamination.**
