Update on Nemaha Co NE 2024 death

(KLZA)-- A story concerning the 2024 death of Alex Mayfield of Auburn noted last week that Mayfield's family alleged the cause of death was ruled inconclusive. However, the cause of death in the final autopsy report lists the cause of death as drowning.

Mayfield's body was discovered in a vehicle in the Missouri River just south of the Brownville Boat dock in August of 2024 after he had gone missing.

Mayfield's family hired a private investigator to further investigate the case as they continue to seek more information on the death.
